

**Johnnie Davis**

Business Line Manager, Resistoflex Plastic Lined Pipe & Fittings
CRANE ChemPharma Flow Solutions®, Resistoflex®
Marion, NC (USA)

Johnnie Davis currently acts as CRANE ChemPharma Flow Solutions® – Resistoflex® NA Business Line Manager, with responsibility for the company's entire line of Plastic Lined Pipe & Fittings throughout North America. In this role Ms. Davis oversees new product development, is accountable for profit, manages demand, and promotes the growth and market share of the Plastic Lined Pipe and Fittings business.

Ms. Davis joined the company in October 1987. Prior to her current position, she served within Crane Co in several roles such as Director of Operations at the Crane Valve facility in Montgomery TX, as Plant Manager at Crane Valves in Washington IA, as Crane Co Global Operational Excellence Deployment Leader / Six Sigma Lean Master Black Belt, and also as Quality Supervisor for Resistoflex in Marion, NC.

Throughout her professional career, Ms. Davis has developed a sophisticated understanding of the mining industry and the technologies used as they relate to the product families she has represented. Her network of contacts in the mining industry helps her to keep up with the leading edge of process and technical knowhow, enabling her to develop and deliver timely solutions as anticipated needs arise.

Ms. Davis holds a Bachelor of Science degree in Business Management from Gardner-Webb University in Boiling Springs, NC, where she graduated Magna Cum Laude while earning success and recognition in several areas, one of which was her admission into membership of the Alpha Chi honors society.
