

**Mike Truby**

Global Business Manager, Ball Valves

CRANE ChemPharma and Energy Flow Solutions®, Xomox® and Krombach®  
Cincinnati, OH (USA)

Mike Truby is the Global Business Manager of CRANE ChemPharma and Energy Flow Solutions for its Krombach® ball valves and Xomox® process ball valves. His global responsibility encompasses the company's entire line of ball valves. In this role, Mr. Truby oversees new product development, profitability, demand, and growth for both soft-seated and metal-seated ball valves.

Mr. Truby joined the company in April of 2010 as a business manager where he led efforts to develop customer opportunities for ball valves at Crane. He also led the Crane launch of its Krombach® ball valves into the global market, and played a pivotal role in defining this product line's outlook, including anticipated requirements that will have to be met.

Prior to joining the team at CRANE, Mr. Truby spent over 20 years with DuPont where he held various positions in process engineering, operations management, and marketing. He has worked in areas such as elastomers, high performance fibers, and nonwoven fabrics.

Mr. Truby holds a Bachelor of Science degree in Chemical Engineering from the University of Delaware.
