Features and Benefits

ELRO® Series T peristaltic pumps are characterized by high mobility and outstanding displacement. They have an integrated vacuum system for constant flow rate and a new portable base frame design. A wide range of accessories enables optimal and efficient use in almost every application.

Key Features

- ① Mobile unit with flow rates up to 18 m³/h effectively handles a wide range of applications, including contaminated and viscous media
- ② The pump is able to self prime up to 9,5mWs without any additional accessories
- ③ With only one wetted part, the hose, the pump delivers reliable service and with a lower total cost of ownership

Sizes

Features and Benefits

Applications

- Environmental technology
- Tank cleaning
- Construction industry
- Plant and tool hire business
- Forwarding agencies
- Docks
- Cleaning companies
- Toilet
- Mobile solutions for trucks

Temperature

Temperature Range: -20°C to +80°C

Product wetted interior	Max. Temperature (°C)
NR	-20 to +80
NBR	-10 to +80
CSM	-20 to +80

Marking and Identification

The pumps are provided with a nameplate containing the pump code, serial number, date of manufacture, and maximum allowed temperature and pressure.

The ELRO® pump code provides all relevant information about the pump, performance, materials and accessories. This allows for accurate linkage to spare parts.

Applied Guidelines

- EC directives: Machinery Directive 2006/42/EC
- Low voltage directive 2006/95/EC
- EMC directive 2004/108/EC
- Harmonized standards: EN ISO 12100, EN ISO 13857, EN 809
- Outdoor directive 2000/14/EC
- RoHS Directive 2011/65/EU

Elastomers

Natural rubber (NR)

Composition: natural substance, high-polymer isoprenes
 Properties: tension-resistant, elastic, cold-resistant, approved for food applications
 Operative range: for abrasive media, diluted acids and alkalis
 Temperature range: -20°C - +80°C / -4°F - 176°F

Nitrile rubber (NBR)

Composition: compound from butadiene and acryl nitrile
 Properties: wear-resistant, grease and oil resistant
 Operative range: for oily and greasy media, alcohols
 Temperature range: -10°C - +80°C / +14°F - 176°F

Hypalon (CSM)

Composition: elastomer formed through polymerisation of chlorosulfonated ethyls
 Properties : chemical resistant, wear resistant and electric conductive
 Operative range: for acids and alkalis, colours
 Temperature range: -20°C - + 80°C / -4°F - 176°F
