## CHEMPHARMA SHOWCASES FKX 9000

23 March 2017

Crane ChemPharma & Energy has announced its participation in the Offshore Mediterranean Conference & Expo, March 29–31. (Hall 2, Stand N31 in the Pala De Andre), in which Crane will showcase its latest product introduction, the Crane®FKX 9000 triple offset valve.

The Crane®FKX 9000 adheres to the industry's most stringent standards, delivering exceptional flow control, optimized Cv and low Delta P, as well as zero-leak\* shut off in high-temperature applications, hydrocarbon service and emergency shut down (ESD) service. Featuring an optimized seat angle, metal-to-metal sealing, innovative stem seal and shaft design, and torque seating, this new valve offers numerous cost, safety and performance benefits. The size of Crane®FKX 9000 will be available up to 48".

In addition to this new product, Crane ChemPharma& Energy will also display several of its other trusted products, including the Pacific® Pressure Seal, Duo-Chek®, and Noz-Chek® energy solutions.
