## Resistoflex® ATL PTFE Advanced Technology Liner for Acid Systems

Resistoflex® ATL PTFE liners are produced from carefully formulated resins and proprietary processing and lining techniques. The result is a molded PTFE liner that provides optimal crystallinity and strength. ATL PTFE liners provide the best permeation resistance in the industry.

- 1 Resistoflex® ATL PTFE reduces permeation rates by up to 60% when exposed to aggressive chemical elements at high temperatures
- 2 Outer shell protection delivers superior permeation control up to 450° F
- 3 Full vacuum rating up to 450°F on sizes 1" – 12"

Resistoflex® ATL provides up to 75% cost savings versus exotic alloys and glass-lined piping
