Speaker Biography

Bruce Harry

Bruce Harry is the Director of New Plant Products at Crane Nuclear, a leading supplier to the nuclear industry of valves, valve parts, valve testing products and technologies, and valve services. With nearly 25 years of tenure with Crane Nuclear, Bruce has more than 30 years of experience in the valve Industry.

Beginning in the Flow Control division of Rockwell International Bruce launched his career in welding and metallurgical engineering. He continued with Hills-McCanna, which was acquired by Rockwell International, as a quality assurance engineer before joining Crane Nuclear in 1989.

Since joining Crane, Bruce has served in a variety of roles, including project engineer, chief engineer, manager of engineering and nuclear products manager. In each of these capacities, he has been involved in nuclear industry motor-operated and air-operated valve programs, and has authored or co-authored five presentations that were delivered to technical conferences within the nuclear industry.

Bruce graduated from The Ohio State University, where he obtained a Bachelor of Science degree in welding engineering.
