Speaker Biography

Matthew Gulyas

Matthew Gulyas is the International Business Development Manager at Crane Nuclear, a leading supplier to the nuclear industry of valves, valve parts, valve testing products and technologies, and valve services. Matt assumed this role in July 2013, after joining Crane Nuclear as a project manager in January 2013.

Prior to working for Crane, Matt spent two years as a valve engineer with Entergy Corporation, where he gained expertise in diagnostic testing and federal compliance while initiating and managing several projects. Matt likewise spent more than three years with Exelon Corporation as a component maintenance optimization valve specialist where he managed up to six crews. While at Exelon, his roles also included confined space team lead, certified refrigerant compliance manager and electrical planner.

For more than six years, Matt was a member of the United States Navy, performing a variety of roles that included electrician's mate (nuclear), load dispatcher, shutdown reactor operator, training petty officer, work center supervisor, quality assurance inspector and quality assurance supervisor. While in the Navy, Matt completed more than 3900 hours of training with the Naval Nuclear Engineering School and more than 260 hours with the Supervisory Development Program.

In 2011, Matt received his bachelor's degree in nuclear engineering technology from Excelsior College in Albany, New York. He has extensive knowledge of electrical, mechanical and nuclear theory, electrical machinery, valves, actuators and packing, valve diagnostic testing, lean management systems and ISO 9000:2000.
