

## DESIGN FEATURES

- 1 Compact, space-saving investment cast valve body.
- 2 Actuator assembly flange acc. to DIN ISO 5211.  
Low torques permit economical actuator selection.
- 3 TA-Luft approved XOMOX S2 double sealing stem system is superior vs. conventional stem designs.
- 4 Blow-out proof stem for exceptional safety requirements.
- 5 Precision-machined super smooth ball surface prevents ball seal wear even at frequent valve operation.
- 6 Anti-static-device guarantees protection against electrostatic charges.
- 7 Full port design minimizes pressure loss and increases flow capacity.
- 8 Wide variety of ball seal designs and materials for critical process media and applications.  
As standard, XOMOX offers compact ball valves up to DN 100 with PTFE ball seals.  
From DN 125 all standard seals will be additionally equipped with reinforcement / support ring.  
For specific working conditions resp. applications, **metal seals** are also available on request.

## S2 – DOUBLE SEALING STEM DESIGN EMISSION-FREE FOR EXCEPTIONAL SAFETY REQUIREMENTS

**TA-LUFT APPROVED**

### Maintenance-free, self-adjusting double sealing system

Design Benefits:

- No external leakage
- Significantly reduced operation and maintenance costs
- No media trapped between primary and secondary seal
- Low torque

Belleville washers for continuous compression of sealing elements

Extended V-ring packing as secondary seal

Spherical stem seal surface (Ball segment)

Efficient primary stem sealing by spherical segment ring (TA-Luft approved)

**Superior sealing system for  
highest safety requirements**

### Reliable S2 double sealing stem design (S2)

More than 3.3 million open-close cycles without external leakage to atmosphere (under standard design working conditions)

## PN 10 - PN 40 DN 15 - 200

### Design Features:

Investment cast body  
Full bore design  
Blow-out proof TA-Luft approved,  
S2 stem design  
Integral DIN ISO 5211 actuator  
mounting pads

### Face-to-face

### Dimensions:

Compact

### Pressure Ratings:

PN 10 - PN 40

### Available Designs:

**Type KK-ETE:** 1.4408 acc. to  
EN 10213-4

Pos.	Part description	Type KK-ETE
1	Body	1.4408
2	Cap	1.4408
3	Ball	1.4408
4	Stem	1.4401
5	Gland	1.4401
6	Stop pin	1.4301
7	Ball seal	PTFE
8	Spherical seal	PTFE
9	Stem packing	PTFE
10	Body seal	PTFE
11	Lock washer	1.4301
12	Handle sleeve	Plastic
13	Handle	1.4308
14	Hex handle nut	A2
15	Belleville spring washer	1.4310
16	Antistatic device	1.4310

\* Normally expected torques, in clean conditions, valid for lubricating process media, at max. allowable differential press (40 bar).

\*\* On request.

Technical data DN 125 and above on request.

## PRESSURE - TEMPERATURE RATINGS

Acc. to ISO 7005-1:1992 and EN 1092-1:1994

## PRODUCT AND SEAL OPTIONS

### Product options

On request our compact ball valves can be supplied in special body materials and as FIRESAFE design (acc. to API-607 and BS 6755).

### Additional scope of supply:

Jacketed-, high pressure-, high temperature and cryogenic design, compact ball valves with stem extension and space filling (PTFE).

### Seal options

Besides the standard seal made out of virgin or reinforced PTFE we offer a broad line of special soft and metal seals for different applications (e.g. high temperatures and pressures, corrosive and abrasive flow media). Packing material and body seals will get selected to meet the specific working conditions.

## OPERATOR OPTIONS

### Manual

#### Handle

As standard, all compact ball valves from DN 15 to DN 100 will be equipped with handle; gears are available as well.

#### Hand wheels

On request all compact ball valves up to DN 40 can be equipped with hand wheels.

#### Locking device for handles

On request, all compact ball valves can be supplied with a special locking device to avoid any accidental or non-authorized operation.

### Automation

#### Actuators

All compact ball valves can be readily and inexpensively fitted with a variety of pneumatic, electrical or hydraulic actuators.

#### Actuator Accessories

XOMOX also supplies a complete line of actuator devices and accessories (limit switches, positioners, solenoid valves, etc.) to compliment your valving needs.
